

Please reject NAB petition 04-160! Weather and traffic reports are safety related and have no business being restricted by the government just because a few busy bodies think they should. They just see it as a few listeners that their not getting but they should be thinking of the safety of the public as a whole and quit thinking about money. Maybe if these stations would talk about the weather and traffic more often we wouldn't have to listen to xm to get this info, but these xm channels really blow the competition away, and it's not even close!
